

1.1 SC Magazine Product Review Names Shavlik NetChk Protect “Best Buy”

Shavlik Scores Strongest in Patch Management Group Test; Editors Call Shavlik NetChk Protect an “Excellent Product with a Fantastic Feature Set”

Shavlik NetChk Protect has earned a 5-star rating and Best Buy designation in a Patch Management Group Test published in the February edition of SC Magazine.

In the comparative review of leading patch management solutions, Shavlik NetChk Protect scored five stars in features, performance, ease of use, documentation, support and value for money.

According to the editors, “The initial interface seemed intuitive and after a few minutes, it becomes clear how the information is organized. There are initial dashboard views that provide an executive summary of the status of your assets, as well as several ways to view the overall organization (based on patches, machine groups, etc.) The console itself is easy to use and discovery and management of assets was fairly straightforward as well.”

To see what SC Magazine has to say about Shavlik NetChk Protect, read the review at:
